

List of Amphibian Species

Lista de Especies de Anfibios

Updated January 2018 / Actualizado enero del 2018.

Despite several surveys throughout the history of the Reserve the species list represents only roughly half of the expected species. This may be due to declining populations of those species or a lack of more systematic sampling during peak periods of activity.

A pesar de varios estudios durante la historia de la Reserva, la lista actual de anfibios sola representa la mitad de las especies esperadas. Unas explicaciones incluyen la disminución de las poblaciones de estas especies y una falta de investigaciones coordinadas con periodos de actividad alta.
